

ANTI CONDENSATION HEATERS

Anti condensation heaters are used to prevent moisture and condensation in cabinets, electrical plants and electronic information boards. The heaters are designed for optimal heat emission. The surface temperature of the heater is low, enabling a safe position near other electronic equipment. The heater is furnished with a temperature limiter and fulfils protection class IP55. Connection cable included. Accessories for assembly on a DIN bar are ordered separately.

Material	Black anodized aluminium Anodized aluminium
Dimension	75 x 72x 57 mm 78.5 x 41 x 41 102.5 x 41 x 41 123 x 41 x 41 145 x 72 x 57 mm 100 x 116 x 53 mm 250 x 116 x 33 mm
Fields of application	Cabinets Electrical plants Electronic information boards Fuel pumps Engines / drives Weather stations
Connection	Cable included
Types	Protection class IP20, IP55 Standard range According to customer specification Model with fan
Others	Power at 10°C: 15, 20, 40, 70, 80, 120, 100, 160, 200 W Alternative: cabinet heater in silicone with cable Regulation: Self-regulating PTC-element, thermal cut-off
